

Responsibility

Carrying essential commodities for over one hundred years has made us the largest marine transportation company on the Great Lakes.

But the price of success is responsibility. Our customers depend on us to deliver much needed resources for power generation, construction, oil refining and steel-making. Salt, grain, limestone, potash and soybeans. All are vital to our economy and high standard of living.

Part of our responsibility is continuous improvement. Ship Management working to ISM Code, ISO 9002 Standard and beyond. Fraser Marine and Industrial, with fabrication and ship repair facilities. Algoma Central Properties, strengthening the Corporation's assets with commercial real estate.

Performance clearly dependent on responsible people. People like Jean Guy Martineau, G.P. Watchkeeper, M/V ALGOEAST.

We are Algoma Central Corporation.
